## **DETAILED ACTION**

### ***Specification***

1. The examiner notes the newly amended title and thus hereby withdraws the objection made to the specification in the previous Office action.

### ***Allowable Subject Matter***

2. Claims 34-37, 39, 47-51 and 61 are allowed.
3. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests or renders obvious a method of fabrication for an electrostatic discharge protection circuit that is formed at an input/output interface of an integrated circuit formed on a substrate which comprises a polycrystalline silicon bounded SCR (silicon controlled rectifier) having a well of a first conductivity type formed within a well of a second different conductivity type with the first well containing a region of the second conductivity type and the second well containing a region of the first conductivity type having a heavily doped polysilicon layer between these two regions and astride the junction between the two wells such that the SCR is connected between a signal input/output interface and power supply connection of the integrated circuit with a biasing circuit connected to the SCR in order to bias the SCR to turn on faster during a electrostatic discharge situation as suggested in claim 34. The examiner is also unaware of any prior art which suggests or renders obvious a method of fabrication for an electrostatic discharge protection circuit that is formed at an

input/output interface of an integrated circuit formed on a substrate which comprises a shallow trench isolation bounded SCR (silicon controlled rectifier) that is connected between a signal input/output interface and power supply connection of the integrated circuit with a biasing circuit connected to the SCR in order to bias the SCR to turn on faster during a electrostatic discharge situation such that a diode on the substrate is connected between the signal input/output interface and the anode of the SCR in order to increase the holding voltage for the SCR when it is on as suggested in claim 61.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
